

Scope of application of the integrated management system of Rohm und Werner GmbH

Scope

The scope defines the physical and organizational boundaries of the management system. When determining the scope, internal and external issues, requirements of interested parties, binding obligations, organizational boundaries, activities, product and service portfolio, and control capabilities are taken into account, as are the needs and expectations of interested parties and the extent of control and influence that can be exercised over activities, products, and services.

Processes

The scope of application covers management, core/performance, and support processes.

Products and services

Mixing, tableting, and filling of powdered detergents and cleaning agents.

Norms and standards

Our management system is based on the specifications and requirements of

- ISO 9001:2015,
- IFS HPC Standard in version 3,
- ISO 14001:2015 sections 4 to 10 and
- the EU regulation (EG) No. 1221/2009 (EMAS).

Exclusions

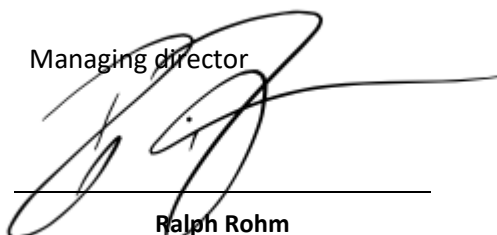

Rohm und Werner GmbH acts as a partner and consultant in the manufacture of ecological detergents and other products in the WPR sector. It provides support as a contract manufacturer or contract processor. Responsibility for product development remains with the customer; the requirements for product development in accordance with section 8.3 of ISO 9001:2015 are therefore excluded from the management system.
